

FAST FACTS ABOUT BIO-TONE® TRIMMING SYSTEM

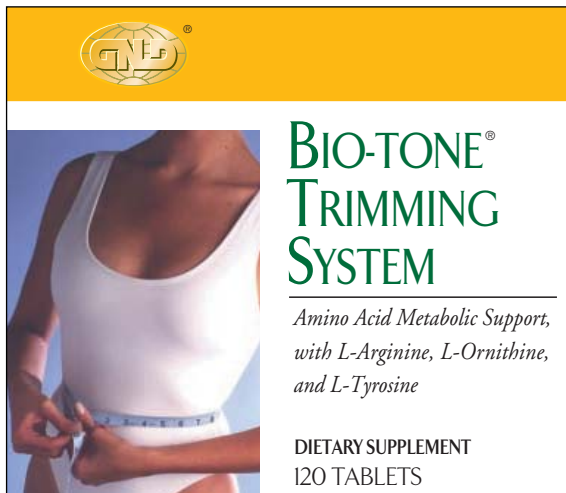

In addition to lowering your caloric intake, a well-functioning metabolism is key to efficient weight loss. GNLD's exclusive Bio-Tone Trimming System provides amino acids and lipotropic factors to support muscle retention, fat mobilization, lean tissue development, and overall body tissue toning.

WHY AN AMINO ACID SUPPLEMENT FOR WEIGHT LOSS?

- Calories are primarily stored in the body as fatty tissue. In order to lose weight, body fats must be mobilized and burned as energy.
- Certain nutrients help support fat mobilization and lean muscle retention.
- Creating specific amino acid ratios in the bloodstream may support the body's ability to biosynthesize important neurochemicals involved in healthy metabolism.

WHY GNLD BIO-TONE TRIMMING SYSTEM?

- 100% natural free-form amino acids includes L-arginine, L-ornithine, and L-tyrosine.
- Supports muscle retention and fat mobilization. Amino acids support lean tissue development, while lipotropic factors aid mobilization and utilization of fats.
- Designed to work while you sleep. Taken three hours after your last meal and before bedtime, Bio-Tone allows for increases in blood levels of specific amino acids in the absence of competing amino acids.
- Supports restful sleep by providing calcium to help relax the nervous system.
- May help you get more out of your workout.

Supplement Facts	
Serving Size 4 Tablets	
Servings Per Container 30	
Amount Per Serving	
L-Arginine Hydrochloride	900 mg*
L-Ornithine Hydrochloride	440 mg*
L-Tyrosine	300 mg*
Special Factors Blend	420 mg*
Dicalcium Phosphate; Inositol; Choline Bitartrate	
* Daily Value not established	
Other ingredients: Hydroxypropyl methylcellulose, stearic acid, magnesium stearate, silicon dioxide, food glaze and magnesium silicate.	
	Lot #
109	Best If Used By

SUGGESTED USE: 4 tablets in the evening at bed time. For best results, take on an empty stomach (approximately 3 hours after a meal).

Arginine, ornithine and tyrosine are important components of efficient metabolism. Arginine is essential for the production of nitric oxide, which supports the body's metabolic processes by relaxing blood vessels and aiding blood flow.*

GNLD chose Bio-Tone's combination of amino acids for their involvement in the body's metabolic processes (including lipid mobilization) and added a Special Blend with lipotropic factors choline and inositol to help balance fat utilization.*
